Project Imputation (Week 2)

By: Ramon van Elst, Adrien Lucbert, Albert Corson, Michael Weij, Jesús Martínez De Juan and Juliën van der Niet

What is our project about?

- Problem: Data loss in Building Management System (BMS) datasets

- Imputation

- Multiple methods examples: KNN, Interpolation

- Research paper Guideline of what method to use in which scenario's

- CLIMA conference 2022

What is imputation?

- Wikipedia: "In statistics, **imputation** is the process of replacing missing data with substituted values"

- Multiple methods

- Backgrounds: Statistical, Linear, Neural Network or Machine Learning

What have we done in the past week

- Contacted problem owner
- Project infrastructure (SCRUM board)
- Preliminary research
- Research proposal outline

What are we working at for coming weeks?

- Research proposal
- Familiarizing with data
- Research into imputation
- Meetings with teachers
